 The product itself is non-flammable. If dried, flammable organic dust may form. The product is a solid mixture of cellulose fibres, plastic and additives, that will burn if ignited or in contact with intense heat. Auto-ignition is possible several hours after processing if the material is not cooled down properly. Dust may be generated during processing. Dust is combustible and may be explosive in the presence of a spark or other ignition sources.
- 5.3 Advice for firefighters**
 In large fires or in confined areas, use appropriate protective equipment and a self-contained breathing apparatus.

SECTION 6: ACCIDENTAL RELEASE MEASURES

- 6.1 Personal precautions, protective equipment and emergency procedures**
 Handle carefully to avoid dust formation. Remove all ignition sources.
 Dust filters are recommended.
- 6.2 Environmental precautions**
 Minimize contamination of drains, surface and ground waters.
- 6.3 Methods and material for containment and cleaning up**
 Use appropriate tools to collect the product for disposal. Flush the area with water.
- 6.4 Reference to other sections**
 Personal protection equipment: see Section 8.2
 Disposal: see Section 13
